Generally, the inverter should be sized to match about 80-100% of your system's DC rating. For example, if you have a 5 kW ...

What Size Solar Inverter Do I Need? A solar inverter should closely match your solar system's output in kW--typically within 80% to 120% of your total panel capacity.

Let's say you have a 6kW solar array (twenty 300-watt panels). Your inverter needs to handle that 6kW of DC power, regardless of whether your home uses 2kW or 10kW ...

For installers and high-energy users, understanding home solar power inverter functionality, calculating how much power does solar power produce, and determining how much power will ...
