In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

As the applications for energy storage cabinets proliferate, understanding the nuances of each application becomes indispensable in determining the requisite battery count.

There are now 394 gigawatts of battery-only projects in the interconnection queue, representing 25 times existing battery capacity on the grid. If it continues to grow at a blistering ...

Battery energy storage has become a core component of utility planning, grid reliability, and renewable energy integration. Following a record year in 2024, when more than ...
