How much does a solar inverter cost?

Most solar panel contractors charge around \$50 to \$100 per hour. You may save \$1,000 to \$2,500 up-front by choosing a string inverter over a microinverter or hybrid inverter. A solar inverter costs \$2,000 on average, with prices often ranging from \$1,000 to \$3,000. That said, some homeowners spend as little as \$800 or as much as \$5,000.

Are solar inverters affordable?

Countries like the USA, Germany, and India have introduced financial assistance programs that reduce the overall cost of solar power systems, making solar inverters more affordable for homeowners and businesses.

Solar Inverter Price Comparison: What to Expect?

Which solar inverter is best?

String inverters are the most affordable. Hybrid inverters cost more because they handle more functionality. Microinverters, one for each panel, have the highest cost per watt due to their quantity. 2. System Size Larger solar panel systems require higher-capacity inverters.

What wattage should a solar inverter be?

System size - Your inverter's input-wattage rating should be close to your solar panel system's output rating. U.S. residential solar panel systems typically fall in the 5 kilowatt range. Efficiency - The industry standard for peak efficiency is 97%. More efficient models often cost more.

Discover the cost of solar inverters, including factors that influence prices, different types available, and how to choose the right one for your budget and needs.

Use our calculator to quickly get price cost estimates for your specific project. Our expert and consumer reviews of the leading brands of residential sized solar inverters show ...

Expect to spend \$0.15 to \$0.24 per watt on a solar inverter, not including labor costs. The size of your system, the type of inverter, and the efficiency rating affect your final cost.

Complete SolarEdge inverter cost breakdown for 2025. Compare prices, models, installation costs, and get the best deals. Updated pricing from \$1,367-\$3,790.
