How much does a 5G base station cost?

Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

How big is the 5G base station equipment market?

The 5G base station equipment market is estimated to reach US\$52.733 billion by 2030 from US\$29.865 billion in 2025, growing at a CAGR of 12.04%. 5G base stations form the backbone of next-generation wireless networks, enabling enhanced bandwidth, ultra-low latency, and broader coverage to support rising connectivity demands.

How much does a 5G network cost?

Here's a look at the main costs involved: The core network is the backbone of your private 5G setup. Investing in core network equipment can cost around \$300,000 initially, with annual licensing fees that may reach \$100,000. However, as the market grows, these costs are expected to decrease, making it more affordable for enterprises.

How much does a private 5G deployment cost?

Initial costs can be around \$100,000. Backhaul connectivity, which links the core network to the internet, can also be a significant expense, often costing \$30,000 to \$80,000. Understanding these costs is essential for budgeting and planning your private 5G deployment effectively.

As global 5G adoption accelerates, communication base station total cost of ownership (TCO) has emerged as the elephant in the server room. Did you know operational expenses account for ...

The 5G base station equipment market is set to grow from \$29.87 billion in 2025 to \$52.73 billion by 2030, at a 12.0% CAGR. Increasing urbanization, rising smartphone ...

Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance.

The cost of base stations and antennas can range from \$50,000 to \$200,000 based on coverage needs. The number of units required will depend on the area size and the density of users.
