Will solar pattern glass reach 100 GW by 2030?

Anshul Vishal, head of corporate development at CPS, estimates that demand for solar pattern glass in North America will reach nearly 100 GW by 2030. This growth is driven by the reshoring of the solar panel manufacturing supply chain in the US.

Why are solar glass suppliers investing in new production capacity?

As PV module capacity increases, glass suppliers are investing in new solar glass production capacity. New facilities are popping up in North America, with unique features to ensure competitiveness, such as using recycled material.

Is glass the future of solar panels?

Weidner says glass for solar panels is now a significant sector of the raw glass market, joining the commercial/architectural, residential and automotive segments. To demonstrate the sector's rapid growth, demand for glass from the solar panel market has risen from 0% five years ago to 5% of the market in 2023, says Weidner.

What is the demand for solar glass?

Andries Wantenaar, from market intelligence company Rethink Technology Research, said that "demand for solar glass is looking robust." "We're excited about the potential for domestic solar manufacturing growth to provide jobs and R&D development in the US," Solarcycle Chief Operating Officer (COO) Rob Vinje told pv magazine.

As in India and China, new facilities are popping up in North America, with unique twists to ensure competitiveness, such as using ...

The nearly 13-Megawatt DC solar field will soon supply clean energy to AGP's glass manufacturing plant in Madera. This will account ...

The US market dominated the North America Solar Photovoltaic Glass Market, by Country in 2023, and is forecast to continue being a dominant market till 2031; thereby, achieving a ...

The North America solar cover glass market has emerged as a pivotal segment within the renewable energy landscape, driven by the region's aggressive shift towards ...
