Learn how to calculate and select the right inverter capacity for your grid-tied solar PV system.

At first glance, it may seem like the inverter is undersized and thus a limiting factor in the system creating power, but it actually a healthy ratio of PV power to inverter power.

DC/AC ratio refers to the output capacity of a PV system compared to the processing capacity of an inverter. It's logical to assume a 9 kWh PV ...

An important thing to note is that the DC size of a solar system is determined by the panel wattage times the number of panels, ...
