An abnormally high inverter output voltage may indicate a malfunction in the voltage regulation circuit. Addressing this issue promptly is crucial to prevent potential damage ...

If the input voltage of the inverter does not match the output voltage of the power supply, the inverter may not operate properly or ...

If the input voltage of the inverter does not match the output voltage of the power supply, the inverter may not operate properly or even damage the inverter and other ...

The solar inverter AC voltage output frequency should be a relatively stable value, usually 50 Hz. The deviation should be within $\pm 1\%$ under normal working conditions.
