What is New York state's energy storage plan?

New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers.

Are energy storage projects safe in New York State?

New York State has some of the most rigorous safety standards for energy storage projects in the country, reinforced by independent nationally recognized experts to ensure full compliance.

Are battery energy storage systems regulated in New York City?

Battery energy storage systems in New York City are rigorously regulated, with oversight from the safety industry, federal, state, and local authorities. All code, location, spacing, and other local requirements must be met.

What is NYCIDA's largest battery energy storage project?

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households.

The Self-Generation Incentive Program (SGIP) offers rebates for energy storage installations, with higher incentives available for high-risk fire areas and low-income communities.

The Order specifies that at least 35% of the benefits of these new energy storage projects will accrue to disadvantaged communities, in accordance with the Climate Act.

The project will be operated by 174 Power Global, in partnership with Con Edison, under the terms of a multi-year contract with Con Edison awarded under a competitive ...

Government subsidies for energy storage projects can be substantial, varying by location and project scope, and are designed to enhance grid reliability, integrate renewable ...
