With hydropower generating over 80% of its electricity, Laos has positioned itself as Southeast Asia's "battery." But here's the million-dollar question: Can Laos leapfrog traditional grid ...

Actually, let's reframe that - with proper investment, Laos might not just solve its own energy puzzles, but help stabilize the entire Greater Mekong Grid. Now that's what I call turning ...

A 2023 ASEAN Energy Report revealed that Laos could've powered an additional 400,000 homes last year if they'd had proper storage solutions. That's where China's expertise enters the picture.

With abundant hydropower resources and growing demand for grid stability, energy storage solutions are becoming critical. This article explores how many energy storage power stations ...
