---

With our energy storage systems, homes and businesses gain access to a safe, reliable and efficient power management that harnesses the full potential of renewable sources.

The array of technologies includes lithium-ion batteries, pumped hydro storage, flywheels, and thermal energy storage systems, each providing unique advantages that ...

The internal capacity reaches up to 9MWh, which is adequate to charge 150 electric cars or power an average German household for six years. To enhance compatibility ...

Electrical Energy Storage (EES) systems store electricity and convert it back to electrical energy when needed. 1 Batteries are one of the most common forms of electrical energy storage.
