---

South Ossetia's growing demand for reliable electricity, coupled with its commitment to renewable energy adoption, has positioned energy storage power supply systems as a critical solution.

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems.

The factory will be powered by a combination of solar power and Polarium's energy storage solutions, making it a net-positive contributor to the South African energy grid.

No matter nights, rainy days or unexpected blackouts off the grid, the solar power is always at your request as a real bank. The built-in optimizer independently manages each battery module..
