---

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.

The distinctive feature of this system is the utilization of liquid cooling technology to maintain the temperature of energy storage equipment, thereby enhancing efficiency and performance.

20ft 2MWh Outdoor Liquid-Cooled Li-ion Battery Container: Advanced thermal management, weatherproof design. Ideal for renewables, grid support, and peak shaving.

The liquid cooling system ensures higher system efficiency and cell cycling up to 10,000 cycles. The liquid cooling system reduces system energy consumption by 20% and extends battery ...
