When the Noor Solar Complex produces excess energy at noon, utilities currently have no cost-effective way to store it. Distributed systems could capture that surplus right where it's generated.

Thanks to its natural resources, advantageous geographical position and strategic partnerships with global players, Morocco aims to ...

To address this, Morocco is resolutely focusing on lithium iron phosphate (LFP) batteries, a reliable, durable technology suited to local constraints. This choice is part of a ...

The planned battery energy storage system (BESS) near the Noor Ouarzazate solar complex will replace less reliable thermal salt ...
