Do ground-mounted solar panels cost more?

Generally, ground-mounted solar panels will cost more to install than an equally sized roof-mounted system. This is partly due to the structure on which the solar panels are installed. A rooftop system is supported by the roof, and the building's structure, meaning erecting a supporting structure is unnecessary.

Are ground-mounted solar panels a good alternative to rooftop solar?

If you have a large, sun-drenched yard, a ground-mounted solar panel system could be a great alternative. Ground-mounted solar panel systems usually cost about 34% more than rooftop solar, according to 2025 EnergySage data. You need a lot more equipment, which adds up.

Do ground-mounted solar panels work?

As the name suggests, ground-mounted solar panels are mounted to the ground, rather than a roof. In most cases, it's easiest and most cost-effective to get a rooftop solar system. But if rooftop solar won't work for your home, ground-mounted systems offer some clear benefits.

What are the different types of ground-mounted solar panels?

There are two basic types of ground-mounted solar panel systems: Standard ground mounts use metal framing driven into the ground to hold your solar panels up at a fixed angle. Operators can manually adjust some standard ground-mounted solar panel systems a few times a year to account for seasonal shifts of the sun.

In this blog, we'll talk about how much it costs to install a ground-mounted solar panel system, as well as how much money a ground-mounted system could save you.

Ground-mounted solar panels are installed on the ground instead of on a roof. They typically cost 10% to 15% more than roof-mounted solar panels.
