In this work, the design and evaluation of a BLDC motor-driven water pumping system that is powered by solar PV array is configured.

For directly powered systems the solar panels start to provide the Solar Power Motor with low power as the sun rises, increasing during the day, and dropping to zero at night. The motor ...

This paper focuses on integrating a SEPIC converter-based brushless DC motor drive in such systems to optimize energy conversion, enhance control, and promote ...

This study presents the design and implementation of a Synchronous Reluctance Motor (SynRM) with an integrated drive circuit for a 4-inch submersible pump motor, tailored ...
