---

The Solar System currently moves through a cloud of interstellar medium called the Local Cloud. The closest star to the Solar System, Proxima Centauri, is 269,000 AU (4.25 ly) away. Both ...

We can study the worlds of our Solar System in more detail than these alien planets, but no other star system so far resembles ours. The contrast between these systems and ours helps us ...

We can study the worlds of our Solar System in more detail than these alien planets, but no other star system so far resembles ours. The contrast ...

The ability to destroy 2 or more solar systems located at a realistic distance from each other (being the distance between us and the other closest solar system), since that's how CSAP ...
