---

Explore reliable power generation systems that integrate wind turbines and solar photovoltaics to provide sustainable energy solutions.

At present, the urgent need on the improvement of the new energy consumption rate, the source-grid-load-storage link coordination, and the complementarity of various types ...

This paper proposes constructing a multi-energy complementary power generation system integrating hydropower, wind, and solar energy. Considering capacity configuration ...

Here, we demonstrate the potential of a globally interconnected solar-wind system to meet future electricity demands.
