Increasing investment in battery storage may be vital for African power systems to function as more solar and wind energy comes online.

In our ongoing Spotlight series on battery energy storage, we now turn our attention to Africa. While attempting to cover this vast ...

Pervasive power supply shortages and the structural failures of the centralized power supply model have created a significant demand for new energy storage (NES) solutions.

This report provides a comprehensive overview of the current status of the energy storage market in East Africa, highlighting key market drivers, technological advancements, ...
