Following the preparation of a preliminary study, the project is to be implemented and completed by November 2025. Photovoltaic systems are already installed on the Spoerry site.

With 87% of Liechtenstein's electricity already coming from renewables, the capital now aims to achieve 100% energy independence through cutting-edge solar technologies. Let's explore ...

In summer months, Vaduz experiences peak solar energy production with an average daily yield of 5.71 kWh/kW due to longer daylight hours and higher sun position in the sky.

Guyana has unveiled a new 0.65 MW grid-forming solar project, paired with a 1,500 kWh battery energy storage system (BESS) and a 13.8 kV transmission line. [pdf]
