How is digitalisation transforming the Nordic power sector?

Digitalisation is transforming the Nordic power sector, enabling smarter, more efficient, and more resilient energy systems. Advanced digital tools are being deployed across the value chain, from generation and grid operations to market platforms and customer interfaces, enhancing transparency, automation, and responsiveness.

What are the emerging technologies in the Nordics?

Here are some of the emerging technologies in this transformation: Battery energy storage solutions (BESS) are expanding across the Nordics, starting from a low base, supported by significant price reductions in recent years. (See news of the first larger BESS debt financing in the Nordics.)

What are Nordic power producers doing with green hydrogen & PtX?

Nordic power producers are actively exploring and developing green hydrogen and PtX solutions to absorb excess renewable generation and supply future fuels. Projects range from onshore electrolysis pilots to large-scale initiatives linked to offshore wind.

How does a hybrid energy storage system work?

It adjusts the frequency based on changes in the output active power, eliminating the need for mutual coordination among units, Tianyu Zhang et al. Simulation and application analysis of a hybrid energy storage station in a new power system 557 resulting in simple and reliable control with a fast response.

As part of the collaboration, HiTHIUM will provide technical training and certification to BOS Power, enabling it to become a certified service provider for localized ...

This project is more than a technical success; it is a pioneering step that redefines the role of energy storage in strengthening power systems.

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, ...

Our hybrid power solution is a system that integrates multiple power sources, such as renewable energy, energy storage, and traditional generators, to provide reliable and efficient electricity ...
