---

Solar energy in Oman is expected to become progressively cheaper in the near future and could be a best return for investments. Its success is merely determined by the ...

The system includes over 1,800 solar panels and is expected to generate 1,700 MWh of electricity annually. It may help avoid around 1,250 tons of CO2 emissions each year. ...

Covering an area of 32.5 hectares in the second phase of the Freezone, the project is anticipated to deliver an annual production ...

We are pleased to announce the successful deployment of a SolarContainer in Oman, where it is now supplying clean and autonomous energy for a mobile Oil & Gas site.
