What is onsite solar?

When a solar system is installed directly on the purchaser's property, and the renewable energy that it produces is consumed there, it's considered an onsite system.

Should you choose onsite or onsite solar?

While both offsite and onsite options offer project structuring with no upfront installation costs and provide renewable energy at a fixed cost, the two system types ultimately can offer their own distinct benefits. When deciding between onsite or offsite solar, let PowerFlex help you choose which option is best for your company.

How do I install solar energy on site?

There are a couple ways to go about installing solar energy on site: one is financing the installation yourself and another is entering into an onsite power purchase agreement (PPA) with a developer.

Is offsite solar better than onsite solar?

Regardless of the exact method, participating in offsite solar can have upsides similar to onsite. While both offsite and onsite options offer project structuring with no upfront installation costs and provide renewable energy at a fixed cost, the two system types ultimately can offer their own distinct benefits.

Design, sales and installation of solar systems for residential homes and commercial businesses. Systems are typically located on either rooftops or ground mounts. Re-roofing and tree ...
