What are the new energy conservation standards for external power supplies?

The U.S. Department of Energy (DOE) has recently proposed new energy conservation standards for External Power Supplies (EPSs). These proposed standards, known as Trial Standard Level 4 (TSL4), aim to tighten energy efficiency requirements across all types of EPSs. TSLs are a tool used by the DOE to set energy conservation benchmarks.

What are the standards for external power supplies?

2. History of Standards Rulemaking for External Power Supplies amended sections 321, 323, and 325 of EPCA (42 U.S.C. 6291, 6293, and 6295). As part power of no more than 250 watts (W).

What are the labeling requirements for external power supplies?

Labeling requirements will be mandated to meet the same International Efficiency Marking Protocol for External Power Supplies Version 3.0 as the previous Level V standard. Globally, it is expected that other nations will soon follow suit with the DoE Level VI standard.

What are Energy Star standards for external power supplies?

It started with relatively simple ENERGY STAR standards for external power supplies in the 1990s. Today, there are standards tailored for the specific operating conditions of various applications, ranging from data center power supplies to white goods, LED light bulbs, electric vehicle battery chargers, photovoltaic inverters, and others.

The U.S. Department of Energy (DOE) has recently proposed new energy conservation standards for External Power Supplies (EPSs). ...

So, when you invest in portable power supplies that meet these vital safety standards, you're not just getting peace of mind; you're also helping to make sure the devices ...

AEO2022 represents current federal and state legislation and final implementation of regulations as of the time of its preparation. See section IV.L of this document for further discussion of ...
