Your power to do something is your ability to do it. Human societies have the power to solve the problems confronting them.

Power definition: The rate at which work is done, expressed as the amount of work per unit time and commonly measured in units such as the watt and horsepower.

Power is the rate with respect to time at which work is done or, more generally, the rate of change of total mechanical energy. It is given by: where P is power, E is the total mechanical energy ...

power, force, energy, strength, might mean the ability to exert effort. power may imply latent or exerted physical, mental, or spiritual ability to act or be acted upon.
