Summary: The Prague Wind and Solar Energy Storage Project has secured a major bid, marking a leap forward in sustainable energy integration. This article explores its technical innovations, ...

Prague has emerged as a hub for solar inverter manufacturing, driven by Europe's push toward carbon neutrality. Over 40% of Czech Republic's electricity now comes from renewables, with ...

Beyond inspiring keynotes and scientific sessions, ClimateEnergy2026 offers interactive and action-oriented formats such as climate dialogues, innovation hackathons, startup pitch zones, ...

The Czech Republic had almost two gigawatts (GW) of photovoltaic capacity at the end of 2010, but installed less than 10 megawatts (MW) in 2011 due to the feed-in tariff being reduced by 25%, after installing almost 1,500 MW the year before. Installations increased to 109 MW in 2012. In 2014, no new installations were reported.
