The Pyongyang storage facility, operational since Q4 2024, uses lithium iron phosphate (LFP) batteries with 180MWh capacity - enough to power 60,000 homes for 3 hours during outages. ...

Romanian transmission system operator Transelectrica has announced a tender for a battery energy storage project with a 35MW power output and 70 MWh storage capacity. [pdf]

Launched in late 2022, this ambitious initiative aims to solve North Korea's chronic power shortages through cutting-edge battery systems. But here's the kicker - they're doing it while ...

The objective of the project HA-G1048 is to maximize the use of the energy produced by the 8-MWp solar photovoltaic plant (SPP) to further reduce the use of thermal power, by ...
