Silicon Valley transit officials are moving forward with plans to dig a single tunnel and close their BART extension funding woes. The strategy is steeped with risk.

A single-bore tunnel is the smarter, faster, and more community-friendly way to complete the final phase of VTA's BART (Bay ...

VTA's BSVII Project is a six-mile, four-station extension that will bring BART train service from the existing Berryessa/North San José through downtown San José to the City of Santa Clara.

While VTA analyzed both tunneling options during the environmental phase, the single bore tunnel is the only option that was ...
