To address this issue, this study proposed a multi-function partitioned design method for VPV curtain walls aimed at reconciling the competing demand of different functions.

In this article we will compile 12 works from the SANAA studio that have great architectural value.

A curtain facade made of invisibly suspended wavy acrylic glass elements envelopes the entire volume of the building, imparting it with an almost immaterial character.

Modern curtain walls are equipped with solar control technologies that regulate the amount of heat and light entering the building. Features like low-emissivity (Low-E) coatings on the glass ...
