Will PV affect the small power system in Seychelles?

If Photovoltaic (PV) systems grow on the power system in Seychelles, issues such as the impact on system frequency due to PV output fluctuations are expected. There are concerns that it may prevent Seychelles from achieving its ultimate renewable energy goal of "15% renewable energy deployment rate by 2030.

What is the Seychelles energy plan?

It targets an ambitious transformation and diversification of the Seychelles' currently 85 MW diesel-dominated electricity generation capacity (on Mahé, Praslin and La Digue), aiming at replacing diesel generators with domestic and international public and private financing.

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

Will granite islands have a 100% renewable power supply?

A first analysis of the power supply of the three main granite islands and a possible development towards a 100% renewable power supply was conducted between December 2015 and April 2016.

Through its investments in solar and battery storage projects across multiple islands, SPS continues to play a pivotal role in supporting the nation's sustainability journey ...
