Product Application Range: Special transformers for wind power, photovoltaic, flywheel, gravity, compressed air energy storage, and pumped storage energy with voltage levels up to 35kV.

Battery Energy Storage Systems (BESS) can store energy from renewable energy sources until it is actually needed, help aging power distribution systems meet growing demands or improve ...

Built for voltages ranging from 11kV to 35kV, it integrates a power transformer, MV switchgear, low-voltage distribution, and EMS interface inside a sealed container, ensuring quick ...

For PV and energy storage plants, solar transformers step up low-voltage power to 10kV-220kV for efficient long-distance transmission, ensuring system stability & safety.
