OverviewHistoryPhotovoltaic (PV) solar coolingGeothermal coolingSolar open-loop air conditioning using desiccantsPassive solar coolingSolar closed-loop absorption coolingSolar cooling systems utilizing concentrating collectors Solar air conditioning, or “solar-powered air conditioning”, refers to any air conditioning (cooling) system that uses solar power. This can be done through passive solar design, solar thermal energy conversion, and photovoltaic conversion (sunlight to electricity). The U.S. Energy Independence and Security Act of 2007 created 2008 through 2012 funding for a new solar air conditioning research and development p...

Looking for an energy-efficient way to cool your home? Our guide to choosing the best solar air conditioner for you has everything you ...

There are two ways to achieve solar power air conditioning. 1. If you outfit a home with a photovoltaic solar power system with enough capacity, it will supply plenty of power to ...

Looking for an energy-efficient way to cool your home? Our guide to choosing the best solar air conditioner for you has everything you need to know.
