---

GTI Energy and University of California, Merced will demonstrate the emerging high-temperature Solar Thermal with Storage (STS) for on-demand process heating at an industrial plant in ...

To achieve the benefits of cleaner electricity with minimal production costs, multi-criteria management decisions are applied.

Solar-thermal hybridization is a way to boost power generation of geothermal power plants, especially when the geothermal resource cannot supply the design flow or temperature.

This analysis evaluates solar thermal- and natural-gas combustion waste heat recovery-based topping cycle hybridization of geothermal binary power plants. This approach provides several ...
