The system combines active safety, streamlined flexibility, and intelligent efficiency by integrating PCS, BMS, batteries, fire protection, and liquid cooling systems in a compact 1.3m<sup>3</sup> footprint.

Improved safety characteristics and specially optimised for the highest requirements on safety, reliability and performance. Suitable for industrial, utility, and grid serving applications, etc.

Designed for efficiency and ease of use, this energy storage container system offers minimalist operation and maintenance, making it an attractive choice for industries that prioritize cost ...

China-based rolling stock manufacturer CRRC has launched a 5 MWh battery storage system that uses liquid cooling for thermal management.
