What is solar control glass?

Solar control glass is designed to manage the amount of solar energy that passes through a building's windows. By limiting the amount of solar energy that enters a building, solar control glass can reduce the need for air conditioning and lower energy costs. Normal glass, on the other hand, does not provide any special solar control features.

Who makes solar control glass?

Pilkington- Pilkington is a UK-based manufacturer of glass products, including solar control glass. Their solar control glass products include Pilkington Suncool, Pilkington Eclipse Advantage, Pilkington Optilam, and Pilkington Activ Suncool. Euroglas - Euroglas is a German-based manufacturer of float glass products, including solar control glass.

How can solar control glass improve the sustainability of a building?

Solar control glass can also help to enhance the sustainability of a building. By reducing the amount of solar heat and light that enters a building, solar control glass helps to reduce the cooling load on air conditioning systems, which can lead to lower energy consumption and reduced greenhouse gas emissions.

Can solar control glass be used in office buildings?

Office buildings are a popular application for solar control glass. This is because they typically have large windows and are often located in urban areas with high levels of solar radiation. Solar control glass can help to reduce heat gain and glare, while still allowing plenty of natural light into the building.

Since 1979, Solar Glass has been a family-owned and operated company, proudly serving the New York area. Our commitment to top-tier ...

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a ...

Chinese scientists develop self-healing solar glass that can generate electricity while remaining transparent.

Glass and solar energy applications go hand in hand. Whether it is a photovoltaic, solar thermal, or concentrated solar power installation, glass is there in one form or the other. In all such ...
