---

This concept, known as distributed solar, leverages otherwise unused space, such as the rooftops of commercial buildings like shopping malls that can support the energy needs of the nearby ...

Most shopping centers have large, flat, empty roofs that can easily accommodate solar panels. These roofs typically receive unobstructed sun exposure, allowing the panels to harness ...

Coloria supplied not only the solar panels (installed on the roof and south-facing facades) but also energy-efficient elevators, LED lighting, and recycled terrazzo flooring.

One significant trend that has emerged is the installation of solar panels on the rooftops of shopping malls. This development not only benefits the environment but also brings ...
