What is Solar Smart glass?

Solar Smart Glass sets the standard in solar control glass. Manual and automatic tuning and variable /dimmable functionality for precise, unrivalled control of solar glare and heat. Made-to-order panels featuring Suspended Particle Device (SPD) film between 2 or more sheets of glass.

What is solar control smart glass?

Delivering made-to-order switchable glass solutions for more than 20 years. spaces that adapt to users' needs at the flick of a switch. Solar control smart glass controls solar glare and reduces the thermal transmittance through a glass facade, directly cutting down on associated HVAC costs.

Does Solar Smart glass reduce glare?

Solar smart glass offers unrivalled control of solar glare and has been shown to reduce the thermal transmittance through a glass facade which directly cuts down on associated HVAC costs. It can be manually or automatically "tuned" to precisely control the amount of light, glare and heat passing through a window.

How does Solar Smart glass work?

It can be manually or automatically "tuned" to precisely control the amount of light, glare and heat passing through a window. Solar Smart Glass sets the standard in solar control glass.

Solar smart glass offers unrivalled control of solar glare and has been shown to reduce the thermal transmittance through a glass facade which directly cuts down on associated HVAC ...

Solar Smart glass features triple-layer Low-E coating, argon gas, and Intercept spacer options for excellent thermal results and maximum solar heat gain performance.

Solar control smart glazing aims at reducing cooling loads during hot months, increasing passive solar heat gains during cold months, improving daylight exploitation and ...

Photovoltaic smart glass converts ultraviolet and infrared to electricity while transmitting visible light, enabling sustainable daylighting.
