This transportable, soil-less, repurposed shipping container design is a combination of hydroponics and aquaculture designed by ...

The situational analysis highlights the importance of fisheries within Somaliland's national development vision and outlines the challenges faced by the sector.

We built an environmentally controlled space in a refurbished shipping container with thermal insulation. This space is equipped with all the technology for intensive breeding of many ...

This system combines traditional aquaculture (raising aquatic animals such as snails, fish or prawns in tanks) with hydroponics (cultivating plants in water). The waste produced by the ...
