Does South Sudan have a high demand for solar products?

This study reveals potentially high demand for of-grid solar products in South Sudan due to the low national electrification rate of 5.4%. However, the lack of affordability and availability of of-grid products hinder consumers from acquiring these products.

Are solar devices a problem in South Sudan?

The second hurdle is the lack of awareness, with 8% of urban and rural populations reporting a lack of knowledge about solar devices. The third barrier to greater penetration of solar devices in South Sudan is poor consumer perceptions of solar product quality.

How many energy companies are there in South Sudan?

There are about fourteen of-grid energy companies in South Sudan, and their services include i) selling solar products, ii) engineering, procurement, and construction (EPC), iii) independent power production (IPPs) and iv) developing mini-grids.

What is South Sudan's role as a power utility?

Its role as a power utility is expected to intensify as programmes to increase electricity access in South Sudan are implemented. It is proposed under the Electricity Bill 2015 as the regulatory entity for the electricity sector in South Sudan. It would function as the energy regulator whose functions would include the creation of regulations.

South Sudan is receiving 20 million USD in funding aimed at solarizing telecommunications towers, a project designed to improve connectivity while reducing energy ...

The equipment, via which Internet connectivity and radio communication are provided, is often power sensitive, yet the equipment does not require high power to operate, making it ideal for ...
