---

The battery energy storage systems are based on standard sea freight containers starting from kW/kWh (single container) up to MW/MWh (combining multiple containers).

Therefore,if you install multiple storage units,you have to space them three feet apart unless the manufacturer has already done large-scale fire testing and can prove closer spacing will not ...

855 allows the AHJ to waive many of the prescriptive measures. The LSFT, which is new for 2026, verifies that complete combustion of one enclosure will not cause thermal runaway in.

The following document clarifies BESS (Battery Energy Storage System) spacing requirements for the EG4 WallMount batteries / rack mount six slot battery cabinet installations.
