The program, titled "Secure, Affordable, and Sustainable Energy for Sri Lanka", will support the country reduce its reliance on expensive fossil fuel imports and accelerate its shift ...

The windy land represents about 6% of the total land area (65,600 km<sup>2</sup>) of Sri Lanka. Using a conservative assumption of 5 MW per km<sup>2</sup>, this windy ...

The scientific, environmental, and systemic evidence is clear: wind energy is not the right renewable energy strategy for Sri Lanka.

It has been proposed to build a wind and solar energy park in the Poonaryn Peninsula. Estimates provide that wind will support a capacity of 240 MW, while solar will support a capacity ranging ...
