---

Herein, we have developed a high-performance triboelectric nanogenerator (SD-TENG) with low friction, high durability, swing-induced ...

The swing mechanism, capable of generating 6-8 volts, successfully converted kinetic energy into electrical energy. This study serves as a renewable energy education ...

play in play grounds and public places, on device such as swing is proposed. When large number of children plays in a school playground, part of the power of heir play can usefully be ...

Imagine if we could store energy using massive concrete blocks suspended from steel frames. When there's excess renewable energy, the system uses it to lift these weights.
