The presented article is a thermal-optical evaluation of an optimized trough solar concentrator for advanced solar-tracking ...

However, more research and development (R& D) has been done to improve its performance, using new materials, absorber tube geometries, solar tracking systems, and ...

A distributed energy system with multi-source cooperative heating that relies primarily on trough solar thermal heating with high efficiency is designed due to low tracking ...

A solar tracker is a device that orients a payload toward the Sun. Payloads are usually solar panels, parabolic troughs, Fresnel reflectors, lenses, or ...
