Can solar power plants help Ukrainian society?

"Solar power plants can help Ukrainian society," Sokolovskyi says, by giving energy independence to private citizens and businesses. Moreover, support for critical infrastructure like hospitals, clinics and schools - the kind of work Semenyshyn's Repower Ukraine does - often comes from PV and energy storage combined.

How much solar power does Ukraine have in 2024?

Figures from the Solar Energy Association of Ukraine (SEAU) earlier this year showed that the country added around 850MW of solar PV capacity in 2024, the majority of which came from self-consumption systems installed by businesses. It's "become a trend", Semenyshyn says.

How does the war in Ukraine affect PV & storage?

The ongoing war in Ukraine has been a catalyst for PV and storage deployment. Image: Oleg Ivanov via Unsplash. When the shelling gets worse, sales of renewable energy systems increase; when it eases, demand subsides until the shelling starts again. "It's pretty funny," says Artem Semenyshyn, board member at RePower Ukraine Charitable Foundation.

Why are Ukrainian businesses turning to self-consumption solar PV systems?

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.

As Ukraine rebuilds its power infrastructure amid ongoing challenges, lithium battery energy storage systems (BESS) have emerged as a game-changer.

UA Warehouse LiFePO₄ Lithium Iron Phosphate Battery Packs provide reliable, high-capacity energy storage for boats, RVs, and solar systems. These 12V/24V/48V 100Ah ...

Ukraine's largest private energy company DTEK secured a \$72-million loan to build one of the largest battery energy storage complexes in Eastern ...

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.
