Energietage unites Storage, Grids & Data to advance Austria's energy transition, featuring the Theiss BESS case by EVN.

This paper presents a novel adaptive control strategy for a grid-connected Battery Energy Storage System (BESS) using a bidirectional Vienna rectifier.

In Austria, only pumped-storage hydro power plants have a long tradition as a means of storing energy. But additional storage capacity using other technologies such as battery storage will ...

A new type of chemical heat storage system has now been invented at the Vienna University of Technology that can be used to store large amounts of energy in an ...
