What is Wellington Battery energy storage system?

Construction commenced on the project. Lendlease was confirmed as the Managing Contractor for the project. The Federal Government announced the project. The Wellington Battery Energy Storage System consists of a battery energy storage system with a capacity of 500 megawatts and up to two hours of storage.

What is the Wellington Battery energy storage system (BESS)?

The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a total discharge capacity of around 400MW. AMPYR Australia, a renewable energy assets developer in the country, owns 100% of the BESS project.

How long will it take to build the Wellington Battery?

Plans for construction of Stage 2 are ongoing, but construction is likely to follow 12 to 18 months behind Stage 1. The existing Wellington substation is very strategically located within the NSW energy grid. The output from both stages of the Wellington Battery represents the demand from over 60,000 homes.

Will Wellington Bess be the largest battery storage project in NSW?

Once operational, it will have a capacity of 1,000-megawatt hours (MWh) of green power. This will make Wellington BESS one of the largest battery storage projects in NSW. Wellington is being constructed at 6773 and 6909 Goolma Road, Wuuluman NSW 2820.

The "Lego Block" Installation Revolution Inspired by Singapore's Sakra project [1], Wellington's team delivered Phase 1 in 150 days - 40% faster than industry average. How? Pre-fab ...

The EIS sets out an expected delivery timeline, with construction expected to commence in late 2025 and take eight months. The NSW Government's ...

Independent energy storage power stations are facilities that harness and store energy independently from traditional grid systems, enabling the efficient management of energy ...

The Wellington Stage 1 BESS is AMPYR's first grid-scale battery energy storage system to reach financial close in Australia. This project is scheduled to be energised in 2026, ...
