What is the Timor-Leste solar power project?

The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 MW/36 MWh battery energy storage system. This will be the country's first full-scale renewable energy IPP project.

When will East Timor's first solar power plant start?

KUALA LUMPUR, Oct 17 (Reuters) - East Timor expects the construction of its first large solar power plant to begin in 2026 and become operational months later, the state utility's chair told Reuters, helping it slash expensive diesel imports.

Will EDTL's solar power plant help Timor-Leste slash imports of diesel?

Sign up here. EDTL Chairman Marito Ferreira said the solar plant will help Southeast Asia's poorest nation, also known as Timor-Leste, slash expensive imports of diesel, which almost entirely fuel its power grid currently, and reduce its fiscal burden.

What is East Timor doing to boost power?

East Timor has also issued rights to mine gold to joint ventures between Timorese companies and Australian miners, and is exploring onshore natural gas in central and eastern Timor, which could further boost demand for power.

East Timor to build its first 72 MW solar plant with 36 MW storage in 2026, reducing diesel reliance and advancing clean, affordable energy access.

Its equatorial proximity, limited grid coverage, and focus on rural development make East Timor an ideal market for solar energy, particularly for off-grid electrification, rural clinics, and village ...

The construction of the solar power plant is a key component of East Timor's strategy to diversify its energy sources. The country has been heavily reliant on fossil fuels, but ...

What is the Timor-Leste solar power project? The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power ...
