The ABB inverter station design capitalizes on ABB's long experience in the development and manufacture of secondary substations for electrical authorities and major end-users worldwide ...

An STS converts LV AC power generated by solar inverters into medium-voltage (MV) AC power and feeds it into a power grid.

A MV-inverter station makes it all possible: Skid or container highlight of this chain is the MV-inverter station, which comprises the switchgear, transformer, and inverter.

If you have a household solar system, your inverter probably performs several functions. In addition to converting your solar energy into AC ...
