---

They are also known as double-layer capacitors or ultracapacitors. Instead of using a conventional dielectric, supercapacitors use two mechanisms to store electrical energy: double ...

Supercapacitors, also known as ultracapacitors or Electric Double Layer Capacitors (EDLC), are electronic devices that store electric charge through electrostatic action, utilizing two carbon ...

The supercapacitor, also known as ultracapacitor or double-layer capacitor, differs from a regular capacitor in that it has very high capacitance. A capacitor stores energy by means of a static ...

Also known as an ultracapacitor or Electrical Double-Layer Capacitor (EDLC), supercapacitors possess a very high capacitance value compared to other regular capacitors.
