Noise at the receiver is commonly referred to as the receiver noise floor. There are many sources of unwanted signals which add up along the entire communication chain and so noise is ...

Noise at the receiver is commonly referred to as the receiver noise floor. There are many sources of unwanted signals which add up along the ...

A common way to lower the noise floor in electronics systems is to cool the system to reduce thermal noise, when this is the major noise source. In special circumstances, the noise floor ...

The downlink path generally has sufficient Signal-to-Noise ratio to ensure quality communications between Public Safety Base and Portables. There are, however, some cases where downlink ...
