Will NXP exit 5G RF power market by 2027?

NXP will close its ECHO GaN wafer fab in Chandler, Arizona, and exit the 5G RF Power market by 2027. Learn why the 5G infrastructure slowdown triggered this major strategic shift and how it affects the global telecom supply chain.

Why is 5G adoption causing network sunsets?

5G adoption has spurred momentum behind network sunsets. This global effort aims to address declining traffic on legacy network generations (2G/3G), the financial burden of maintaining legacy infrastructure, and the need to use spectrum resources efficiently by migrating to newer (4G/5G) technologies.

How many networks will be shut down by 2025?

According to GSMA Intelligence, 131 networks are planned to be shut down by 2030, with 61 scheduled for 2025. Why does it matter? The continuous evolution of technology increases the demand for additional spectrum resources by different communications service providers.

How can regulators improve the adoption of 4G/5G networks?

Regulators can implement supporting measures to complement the adoption of 4G/5G networks, facilitating smoother network sunsets. Technology-neutral licensing is essential for legacy network sunsets. It allows mobile operators to refarm spectrum used for legacy networks for 4G and 5G services at a pace driven by market demand.

Net 5G base station (BTS) or "site" additions have plunged in recent quarters, underlining the steep decline in network-building capital expenditures of both Reliance Jio and ...

At first, many people thought that 5G can only be used in commercial applications, but now 5G technology has gradually penetrated into the civilian field. In the question and discussion of ...

Recently, the three major operators have issued notices announcing that they will shut down 5G base stations in the early morning. This move has attracted widespread ...

NXP Semiconductors has announced a significant strategic shift: the company will shut down its ECHO GaN wafer fabrication facility located in Chandler, Arizona, and withdraw ...
